

## 2016 June *Guess that Plant*

*Draba verna* L., Whitlow-Grass, Spring Draba

The June *Guess that Plant* was a common weedy annual seen in open disturbed areas, lawns and fields in the spring. Whitlow-Grass is a member of the Mustard family, the Brassicaceae. Whitlow-grass is found throughout the Eastern United States and is also found on the West Coast. The plant is found in all New Jersey Counties, where rich soil and open conditions exist.
