

2016 December *Guess that Plant*

Juncus militaris Bigel. Bayonet or Military Rush

The December *Guess that Plant* is *Juncus militaris*. This species is an obligate wetland species, and it always found partially submerged within stream channels and wet savannas of the Pine Barrens. Mary Hough (1983) indicates records for Sussex and Warren Counties as well. Its habitat is one character that would help identify the plant, as are the septate-divided leaves and open panicle with the perianth of sepals and petals equaling the capsule.
