

2020 September *Guess that Plant*

Eutrochium fistulosum (Barratt) E.E. Lamont., Hollow Stem Joe-pye, trumpetweed

The September 2020 *Guess that Plant* was a native New Jersey composite currently named *Eutrochium fistulosum* (Barratt) E.E. Lamont. This genus has undergone multiple revisions, and has found a home in the genus *Eutrochium*. Hollow stem joe-pye weed is found in rich wetlands throughout the State, but is best represented in the northern Piedmont region and upper Delaware River valley. The plant flowers from midsummer until early September.
